FUAAD ABDULLAH

SOFTWARE ENGINEERING / AI SYSTEMS / FINTECH TOOLS

Atlanta, GA | heyimfuaad.me | linkedin.com/in/fuaadabdullah

Professional inquiries: heyimfuaad.me/contact

PROFILE

Product-focused software builder and Georgia State University student working across full-stack development, AI infrastructure, and financial decision tools. Interested in engineering opportunities, internships, and selected customer projects.

TECHNICAL STRENGTHS

Languages: Python, TypeScript, JavaScript, SQL. Frontend: React, Next.js. Backends: FastAPI, REST APIs, model-provider routing. Infrastructure: Docker, PostgreSQL, Redis, Vercel, Linux.

SELECTED ENGINEERING WORK

AyahOS and Goblin Assistant

AI orchestration

Designed and iterated on multi-provider AI request routing, runtime observability, operator controls, and a customer-facing chat experience. Emphasis on modular architecture and trustworthy execution.

RIZZK Risk Calculator

Fintech / trading

Developed a position-sizing and risk-to-reward decision tool for active traders, emphasizing reproducible calculations, practical UX, and risk controls.

GradeM8

Applied AI

Developed a document-grading workflow demo using Python, model-assisted assessment, and automated testing.

Customer Website Delivery

Web engineering

Built and delivered multi-page service websites with mobile-first navigation, contact flows, and search-friendly content.

EXPERIENCE

Independent Developer and Product Builder

2023 - present

Build and maintain software tools, trading workflows, and client-facing web products. Own requirements, implementation, deployment, and iterative improvements.

Junior Account Manager

2022 - 2023

ABC Consultants Group: client coordination, reporting, Salesforce tracking, and delivery follow-through.

EDUCATION

Georgia State University | Undergraduate studies in progress | Atlanta, GA.
