

Fuaad Abdullah

B.B.A., Finance — Full-Stack Developer · Day Trader · AI & Automation Engineer

fuaadabdullah@gmail.com · (404) 494-6262 · heyimfuaad.me · Atlanta, GA

SUMMARY

Product-minded software engineer and disciplined active trader who ships production tooling for trading operations, reporting, and AI orchestration. Bridges finance domain expertise with full-stack execution to deliver reliable, observable systems that cut manual work and sharpen decision quality. Strengths: turning ambiguous requirements into shipped deliverables, clear stakeholder communication, and disciplined operational execution.

SKILLS

Languages & Frameworks: Python · TypeScript · JavaScript · Rust · SQL · React · Next.js · Streamlit · FastAPI

Data & Automation: pandas · numpy · ETL pipelines · spreadsheet automation · reporting workflows · dashboard delivery

Infrastructure: Docker · Linux · Git/GitHub · WebSockets · REST APIs · PostgreSQL · Redis · Vercel · Fly.io · Azure

AI & ML Ops: Model hosting · Hugging Face Spaces · inference pipelines · LLM provider routing · observability

Trading & Ops: Risk management · position sizing · trade journaling · weekly performance reviews · execution discipline

EXPERIENCE

Independent Day Trader & Full-Stack Developer

Self-employed · Feb 2023 – Present

- Trade equities under strict risk controls with documented trade logs; run weekly reviews to refine edge and execution quality.
- Shipped production Streamlit apps — position-sizing calculators, trade-log exporters, and performance dashboards — used daily in live trading workflows and by freelance clients.
- Delivered automation scripts and spreadsheet overhauls that cut manual reporting effort and improved data accuracy for small-business clients.

Jr. Account Manager

ABC Consultants Group · May 2022 – Feb 2023

- Owned client communications, project documentation, and status reporting to drive timely invoicing and on-schedule delivery.
- Maintained Salesforce and internal trackers to surface account health and eliminate missed deliverables.
- Coordinated cross-functional teams to align priorities and clear delivery blockers.

Marketing Intern

Mixdiety · Jun 2021 – Feb 2022

- Conducted market and customer research that directly informed campaign strategy and audience targeting.
- Ran multi-channel outreach (email, social) and built performance summaries that guided leadership decisions.

- Streamlined campaign reporting to clarify ROI and prioritize follow-up actions.

Server — Benihana

Jun 2020 — Jun 2021

- Delivered high-volume customer service; coordinated front-of-house and kitchen timing during peak service.

Server — Intermezzo Cafe

Jan 2019 — Jun 2020

- Drove upselling initiatives and sustained fast-paced, professional customer interactions.
-

EDUCATION

Georgia State University · B.B.A., Finance · 2020 – 2025

Coursework: Financial Accounting · Business Technology · Marketing Principles

North Springs Charter School · High School Diploma · 2017 – 2019 · GPA 3.7

PROJECTS

Goblin Assistant — Featured

Production multi-provider AI assistant with routing, observability, and privacy controls.

FastAPI · Next.js · TypeScript · PostgreSQL · Redis · Docker · Fly.io · Vercel

- Architected provider-routing and request orchestration supporting multiple LLM hosts with health checks and automatic fallbacks.
- Built observability layer — metrics, health monitoring, and latency tracking — for provider performance and system reliability.
- Designed privacy-aware request flows and modular backend services; deployed full stack to production infrastructure.

RIZZK Calculator

Production position-sizing and risk management tool for active day traders.

Python · Streamlit · Plotly · Docker · Azure

- Built live risk calculator with exportable trade logs used in active trading workflows.
- Added dashboarding for weekly performance reviews and automated position sizing.

GradeM8

Model hosting and inference workflow demo integrating Hugging Face Spaces.

Next.js · TypeScript · Hugging Face Spaces · Vercel

- Connected frontend UI to hosted inference endpoints; demonstrated real-time prediction pipelines.
- Showcased end-to-end deployment flow for scalable ML product delivery.

ShopMindAI

Automotive diagnostic assistant with ranked causes and confirmatory test suggestions.

FastAPI · Python · SQLAlchemy · FAISS · Azure

- Built semantic search over service manuals returning ranked diagnostic suggestions with confidence scoring.
- Added observability endpoints and structured logging for debugging and production scaling.

Elbey Projects Website

Conversion-focused marketing site for a mobile mechanic business.

Next.js · TypeScript · Tailwind · Vercel

- Implemented conversion-optimized UI with analytics hooks to track bookings and lead flow.

Portfolio — heyimfuaad.me

Personal site featuring blog, case studies, and SEO optimizations.

Next.js · React · TypeScript · Tailwind · MDX · Vercel

KEY ACCOMPLISHMENTS

- Launched a production AI orchestration platform (Goblin Assistant) with multi-provider routing, observability, and privacy controls.
 - Built trader-facing tooling that eliminated manual sizing and logging friction in live workflows.
 - Delivered client automation and reporting work that improved invoice accuracy and cut manual reconciliation overhead.
 - Shipped end-to-end features across the full stack repeatedly: Next.js → FastAPI → Docker → cloud.
-

CERTIFICATIONS

- **Excel Quick Tips** — LinkedIn Learning (Sep 2025)
 - **Creating Your Personal Brand** — LinkedIn Learning (Oct 2025)
-

AVAILABILITY

Open to software engineering roles (fintech preferred), internships, and contract development that value product thinking, disciplined execution, and end-to-end delivery.
